

**Blue Cross of Idaho's
Standard Six-Tier Prescription Drug
Formulary**

This document is a searchable PDF. On your keyboard press Ctrl+F (Command+F for Mac) and a search field will open. Type in the name of the drug you are looking for in the search field, press enter and it will locate the name of the drug in the document.

Things to know about Blue Cross of Idaho's Standard Six-Tier Prescription Drug Formulary

The Blue Cross of Idaho formulary is a list of drugs approved by Blue Cross of Idaho's Pharmacy and Therapeutics Committee for coverage under your pharmacy benefit. The formulary includes brand name as well as generic drugs that have undergone rigorous testing and are approved by the Food and Drug Administration (FDA). Not all drugs approved by the FDA are covered under the Blue Cross of Idaho formulary.

Please Note:

Your specific prescription benefit plan may not cover certain products or categories, regardless of their appearance in this document. Your copayment amounts may vary based on the structure of your prescription benefits. Products recently approved by the U.S. Food and Drug Administration (FDA) may not be covered upon release to the market.

The Multi-Tier Formulary

In most cases you will be responsible for a portion of the cost of each prescription you have filled, and depending on the drug prescribed, your cost can vary. The Blue Cross of Idaho formulary has six tiers, with the first tier costing you the least and the sixth tier costing you the most. Asking your doctor to prescribe drugs listed in the first, second or third tier of the formulary can save you money.

Tier	Description
1	Preferred Generic Drugs are equivalent to brand-name drugs in dosage, safety, strength, method of administration, performance characteristics and intended use and Blue Cross of Idaho has rated as preferred due to their quality and cost-effectiveness.
2	Non-Preferred Generic Drugs are equivalent to brand-name drugs in dosage, safety, strength, method of administration, performance characteristics and intended use but come with an excessive cost compared to other alternatives within the same drug class.
3	Preferred Brand-Name Drugs are drugs that Blue Cross of Idaho has rated as preferred due to their quality and cost-effectiveness.
4	Non-Preferred Brand-Name Drugs are clinically effective medications but come with an excessive cost compared to other alternatives within the same drug class.
5	Generic Specialty & Preferred Specialty Drugs are medications used to treat complex conditions and Blue Cross of Idaho has rated as preferred due to their quality and cost-effectiveness.
6	Non-Preferred Specialty Drugs are medications used to treat complex conditions but come with an excessive cost compared to other alternatives within the same drug class.
ACA	Affordable Care Act Drugs are drugs prescribed for covered preventive services that may be available at no cost to members under the regulations of the Affordable Care Act. Some plans grandfathered under the Affordable Care Act may not be eligible for the ACA preventive drugs at no cost.

This formulary is not an all-inclusive listing, and is subject to change as new products and information become available.

If you cannot find a drug you are using on this formulary, call the Blue Cross of Idaho Rx number on the back of your member ID card or log onto **members.bcidaho.com** using your unique login and password.

If you have questions about any of your medications, please discuss them with your doctor or pharmacist. You can also refer to your group's contract provisions for more information about the terms and conditions of your prescription drug benefit.

Reading the Formulary

On the following pages, you'll find a list of prescription drugs and columns that list the tier they each belong to and any specific requirements or limitations.

Column Name	What you will find in each column:
Drug	Name of covered prescription drugs
Reference	Brand name of the covered generic drug listed in the Drug column. *Please see information below regarding Mandatory Generic Substitution
Tier	The tier assignment for the prescription drug listed in the Drug column
Notes	Requirements and limitations, as well as indicating if drugs are part of the Preventive Drug List for HSA Plans. See Abbreviation Dictionary on the next page for definitions and more information about the abbreviations.

Mandatory Generic Substitution

Some Blue Cross of Idaho prescription drug plans include a mandatory generic substitution requirement. When a drug has both brand and generic forms available, the generic drug is listed under the Drug column as the covered option with the brand or trademark name listed under the Reference column. When you or your physician choose the brand name drug, in addition to any applicable cost share (deductible/coinsurance/copayments) for the brand name medication, you will pay the cost difference between the contracted cost of the generic drug and brand name drug. These cost difference amounts do not apply to your annual out of pocket maximum.

- Reference Specialty Drugs, designated by an SP in the Notes column, will apply a Tier 5 and 6 cost share prior to the cost difference calculation
- All other Reference brand name drugs will apply a Tier 4 cost share prior to the cost difference calculation

Newly Approved Prescription Drugs

Any newly FDA approved prescription drug, biological agent, or other agent is excluded from coverage by Blue Cross of Idaho until it has been reviewed and approved by Blue Cross of Idaho's Pharmacy and Therapeutics Committee. The Blue Cross of Idaho Pharmacy and Therapeutics Committee meets quarterly to review newly approved drugs and older medications for coverage recommendations. The committee is comprised of practicing board-certified physicians and licensed pharmacists from across the state of Idaho.

Abbreviation Dictionary

PA - Prior authorization

Medications that list PA need prior authorization from Blue Cross of Idaho before we will cover the drug. Your provider must provide documentation showing that the prescription is medically necessary. If prior authorization is not obtained, you may be held responsible for the entire cost of the drug. Please refer to your policy (also called a member contract) for more information about prior authorization. You can find a copy of your policy and detailed information on the prior authorization process online by logging into members.bcidaho.com.

PREV - Preventive Drugs for HSA Plans

Some preventive drugs may be available at no cost to members of High Deductible Health Plans, also known as HSA plans. Preventive medications are prescribed for the prevention of conditions or illnesses when individuals may be at high risk.

QL - Quantity Limits

Some formulary drugs can only be filled in limited quantities. These prescriptions have been found to be less effective or even dangerous when taken at higher than normal doses. The limits on OL drugs are in line with manufacturer's recommendations regarding safety and effectiveness.

SP - Specialty Drug Program

Specialty medications are generally prescribed for treatment of complex, on-going medical conditions. These medications are generally high cost, and have specific handling requirements. All specialty drugs are limited to a 30 day supply per fill.

ST - Step Therapy

You may need to use one or more alternative medications before Blue Cross of Idaho can authorize benefits for the use of another medication. Blue Cross of Idaho wants to ensure providers are trying equally or more effective, low-cost options before recommending effective, but higher cost treatments.

AL - Age Limitation

Some drugs may only be safe or recommended for certain age groups. Blue Cross of Idaho places age limitations to ensure drugs are not prescribed to individuals who are not of the recommended age.

DISCRIMINATION IS AGAINST THE LAW

Blue Cross of Idaho and Blue Cross of Idaho Care Plus, Inc., (collectively referred to as Blue Cross of Idaho) complies with applicable Federal civil rights laws and does not discriminate on the basis of race, color, national origin, age, disability or sex. Blue Cross of Idaho does not exclude people or treat them differently because of race, color, national origin, age, disability or sex.

Blue Cross of Idaho:

- Provides free aids and services to people with disabilities to communicate effectively with us, such as:
 - o Qualified sign language interpreters
 - o Written information in other formats (large print, audio, accessible electronic formats, other formats)
- Provides free language services to people whose primary language is not English, such as:
 - o Qualified interpreters
 - o Information written in other languages

If you need these services, contact Blue Cross of Idaho Customer Service Department. Call 1-800-627-1188 (TTY: 711), or call the customer service phone number on the back of your card. If you believe that Blue Cross of Idaho has failed to provide these services or
