

HSA Preventive Drug List

You Make the Choices, We Make it Easy

If your Benefit Summary indicates specific coverage for preventive drugs, the Preventive Drug List provides the drugs you can obtain under this benefit. Plans that have specific preventive drug benefits are generally:

- High Deductible Health Plans (HDHPs) or Health Savings Account (HSA) plans
- Employer plans that have purchased an HDHP/HSA plan
- Employer plans that have purchased a preventive drug enhancement

Blue Cross of Idaho covers the drugs on this list at the preventive drug cost-sharing amount found in your plan documents, and you do not need to have met your deductible when you get these prescriptions filled at an innetwork pharmacy.

For our members:

- Visit an in-network pharmacy to receive this benefit.
- Present your Blue Cross of Idaho member ID card to ensure you receive the complete benefit.
- You or your doctor may be asked to provide supporting documentation that the drug you are taking is being used for prevention.

For our healthcare providers:

 Please prescribe preventive drugs from this list and allow generic substitutions when medically appropriate.

NOTE: A drug's appearance on this list does not guarantee coverage. Not all drugs listed are covered by all prescription drug plans. Certain drug plans may cover additional drugs at a preventive benefit that are not listed below. Check your benefit materials for the specific drugs covered and the costshare information for your prescription-drug benefit program. This list may not include all prescription drugs intended for preventive purposes. This list is periodically reviewed by clinical experts. Medications may be added or removed from this list based on clinical review of the medication's intended and its availability.

How to use this list:

Generic drugs are listed in lower case letters, example: atenolol. Generic medications contain the same active ingredients as their corresponding brand-name counterparts; though they may look different in shape and color, they have been FDA-approved under the same strict standards.

Brand-name drugs are listed in CAPITAL letters, example: NOVOLOG. When brand-name drugs lose their patents and become available generically, only the generic equivalent will be eligible under this preventive benefit.
