

PREVENTIVE CARE

Highlights of your preventive care benefits

Applies to non-grandfathered individual and group plans

You pay nothing – no coinsurance, copayment or deductible – for covered preventive care services when you visit in-network providers. Preventive care benefits for services from out-of-network providers are subject to your out-of-network benefit.

The listed preventive care services may be adjusted to agree with federal government changes, updates and revisions.

Updates for 2021: Added perinatal depression counseling and intervention for pregnant women or women who may become pregnant. Replaced the term “aortic aneurysm screening” with “abdominal aortic aneurysm screening.” Replaced the term “transmittable diseases screening” with “transmittable disease screening and counseling.”

Services for adults (18 years and older)	Services for adults (continued)	Services for children (17 years and younger)

Please note: Your provider must bill these services as preventive/wellness services.

The descriptions above are general in nature, to allow for an overall view of Blue Cross of Idaho’s preventive care coverage. For complete descriptions of your policy and policy changes, please read your policy and policy amendment language.

Preventive Schedule

Make a Plan for Your Health

People plan ahead for many things – vacations, buying tickets to the big game or making reservations at busy restaurants – because they want to make sure they have access to things that are important.

Planning ahead in healthcare is a good idea, too. There are certain services that you need annually, including wellness visits and flu shots, which you can schedule months in advance. By doing so, you can be sure you aren't scrambling to find an appointment later in the year.

Scheduling early also has other benefits, like being able to choose the time of your visit. Whether you prefer morning, afternoon or weekend appointments, scheduling early gives you the best chance at getting the dates and times you prefer.

✓ CHECK WHEN COMPLETED	FREQUENCY	DATE SCHEDULED
<input type="checkbox"/> Annual wellness exam	Every 12 months	
<input type="checkbox"/> Blood pressure test	At least every year ²	
<input type="checkbox"/> Cholesterol test	Every 5 years ²	
<input type="checkbox"/> Body mass index test	Every year	
<input type="checkbox"/> Bone mass measurement	Every 1-2 years	
<input type="checkbox"/> Breast cancer screening	Ask my doctor	
<input type="checkbox"/> Colon cancer screening	Ask my doctor	
<input type="checkbox"/> Diabetes screening (A1C)	At least annually ²	
<input type="checkbox"/> Flu vaccine	Every year	
<input type="checkbox"/> Pneumonia vaccine	Once after age 65	

²Your primary care provider (PCP) will help you decide if you need more frequent screenings.

Depending on your health and personal risk factors, your preventive care schedule may differ from the standard recommendations. Talk with your doctor about a schedule that's best for you. If you have particular risk factors like a chronic disease, obesity, or a family history of a disease, your PCP may recommend additional screenings.
