

## Discover the Delta Dental Wellness Toolkit

Good oral health is essential for overall wellness, and Delta Dental of Idaho is here to help your employees focus on their well-being. We provide tools, resources, tips, and touchpoints to help your team maintain excellent oral health.

Healthy smiles lead to happy employees! But there's more to the story—healthy employees are also less likely to miss work due to oral health issues, which can be a hidden productivity drain. They're also more likely to lower overall healthcare costs, making it a win-win for both employees and employers.

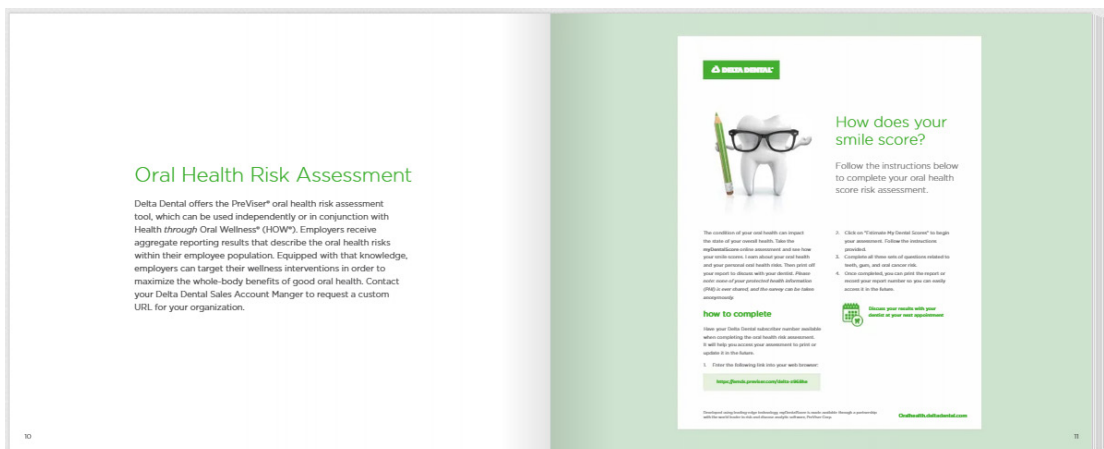

That's why we've created the Delta Dental Wellness Toolkit: an extensive collection of educational tools designed to support your wellness initiatives and empower your employees to take charge of their oral health.

### What's Included in the Wellness Toolkit?

- **Engaging Oral Healthcare Topics:** Resources in multiple formats, such as emails, posters, and articles, that are easy to share and quick to captivate your employees' attention.
- **Comprehensive Online Resources:** Access a wealth of helpful tools, including our Oral Health Risk Assessment (OHRA) and a library of dental-related information to encourage preventive care.

Delta Dental of Idaho offers the expertise and support you expect from America's leading dental benefits provider. With the largest dental networks and a commitment to promoting oral health, we prioritize wellness for your business and your team.
